

Residential refurbishment

Residential refurbishment

If you are thinking about extending your property, constructing a basement or just looking to install a state of the art kitchen, we can help you achieve your vision.

Cluttons is a property consultancy who oversees the refurbishment and extension of high-end London properties. We have a team of chartered surveyors and designers who have a wealth of experience in creating designs to suit client requirements and who are highly proficient in appointing specialist contractors, controlling costs and managing the construction process.

We can provide the following:

- initial scheme review, enabling you to develop your ideas;
- concept design and project budget cost estimation;
- in house specialist technical advice on planning, building regulations consent and party wall legislation;
- access to an extensive list of vetted contractors (all SAFE contractor accredited) who are experienced working in London homes; and
- project management of your refurbishment through to completion.

We offer an initial informal consultation, at no charge to you, during which we can discuss your requirements.
